

STAM-2 BE Pro

PACKAGE

STAM-2 BE Pro is a monitoring package which includes: **STAM-1 PE** Ethernet receiver base card, enhanced version of **STAM-2** software with license for 10 workstations, USB protection dongle and receiver card installation guide.

The purpose of the package is quick and, above all, effective reception of event transmissions from the monitored premises and proper response to the incoming events.

One-day training in operation and control of the STAM-2 monitoring station, conducted at SATEL's premises, is provided as part of the STAM-2 BE Pro bundle.

- Ethernet base card + PRO Program for the STAM-2 (WIN) supervising station for 10 workstations with extended functionality + hardware key + 1-day training in the SATEL
