MIO-400

The **MIO–400** module is used to supervision and control of fire protection equipment or fire protection systems and other devices.

It is designed to operate in the detection line of the **ACSP–402** addressable fire alarm control panel.

- 4 inputs:
    - selection of input polarity: NO or NC,
    - programmable input type,
    - detection of short circuit or open circuit.
- 4 relay outputs:
    - programmable output type,
    - capability to control electrical devices powered with 230 VAC,
    - resistive, inductive or capacitive load switching.
- Double–sided short–circuit isolator.
- Power from the detection line.
- LEDs to indicate:
    - input state,
    - output state,
    - faulty input,
    - faulty module.
- Mountable on 35 mm DIN rail.

Operating temperature range	-10°C...+55°C
Weight	225 g
Maximum humidity	93±3%
Dimensions	122 x 93 x 58 mm
Current draw when detecting	600 µA
Current draw when emitting an alarm	750 µA
Power supply voltage	18...26 V DC

CE
