DB-100

CONVENTIONAL MOUNTING BASE FOR POINT FIRE DETECTORS

The mounting base for CSP system detectors facilitates the assembly and dismantling of the detectors without the need to disconnect cables. This greatly simplifies the implementation of periodical system maintenance procedures and required replacement of devices.

- supports **DMP–100**, **DRP–100** and **DCP–100** detectors
- a detector may be locked in the mounting base which prevents it from being dismantled without the use of tools,
- additional earth cable clamp (PE) which facilitates the mounting of the system using shielded cables
