

JA-150TP Wireless indoor thermostat

Designed to measure and control the indoor temperature. The thermostat expands the application range of the JABLOTRON 100+ system in the domain of home automation with simple zone control.

• Declaration of conformity - JA-150TP (PDF 320.23 kB)

Description

For switching the heating, standard control panel programmable outputs are used.

In a building, up to 16 thermostats can be installed that can control up to 16 independent circuits. The product is a component of the JABLOTRON 100+ system, is addressable and occupies one position in the system.

- Full integration in MyJABLOTRON = information on the current status and remote control of the thermostat
- $\circ\;$ Automatic switch-over to the economy temperature on setting the premises
- Weekly schedule mode
- \circ $\,$ Possibility to enter the manual temperature setting mode
- $_{\odot}~$ Possibility to switch off if only a minimum temperature should be maintained in the building
- \circ $\,$ Heating suppression if a window is open $\,$
- Report in the case of overheating or freezing
- Easy control by dial
- Temperature history graph

Technical specifications

2x AA 1.5 V (LR6) alkaline batteries
Caution: batteries are not included
approx. 2 years
868.1 MHz, Jablotron protocol
aprox. 300 m (open area)
10 mW
66 x 90 x 22 mm
60 a
60 g
-10 °C to +70 °C

JABLOTRON ALARMS a. s. | Pod Skalkou 4567/33 | 466 01 | Jablonec n. Nisou | Czech Republic www.jablotron.com

Measuring range	-10 °C to +70 °C
Temperature regulator class	I. (according to (EU) no. 813/2013)
Contribution of regulator to seasonal efficiency	$\eta S = 1\%$ (according to (EU) no. 813/2013)
Operational environment according to	EN 50131-1 II. Indoor general
Temperature measuring sensitivity	±0.1 °C
Also complies with	ETSI EN 300 220, EN60950-1, EN 50130-4, EN 55022
Can be operated according to	ERC REC 70-03
