

PT-P700-X Label printer

Using this printer you can **print labels for control segments of access units (keypads) at installation**. The printing is possible straight from F-Link software version 1.2.0 or higher from the access module internal settings.

Description

The drivers have to be installed for the proper functioning of the printer. The printer can also be used for printing labels using P-Touch Editor Lite software saved inside the printer memory. In this case no drivers are required.
